Artificial Intelligence Application Development

Module - II

Practical – II

Roll No.:T007	Name:subhashree jena
Class:TYIT	Batch:1
Date of Assignment: 2/09/26	Date/Time of Submission: 2/09/26

2.Team Creation & Role Assignment.

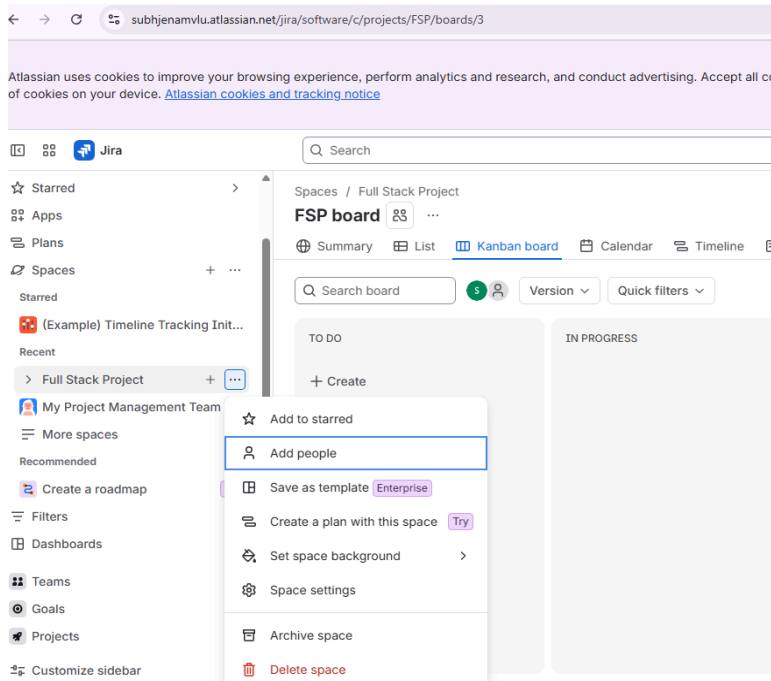

A. Add Team Members.

Step 1: Open the Jira project

1. Open Jira.
2. Open the previously created Full Stack Project space
3. Make sure you are inside the correct project before adding members. Why are we doing this? We open the existing project because the team member must be added to the particular project in which they will work

Step 2: Open the project menu

1. Locate the Full Stack Project space name.
2. Click the three-dot (⋮) menu next to the space name.
3. A menu containing different project options will appear. Why are we doing this? The three-dot menu provides additional management options for the selected project, including the option to manage project members.

Step 3: Select "Add people"

1. From the menu, click Add people.
2. The Add people to Full stack Project window will appear.

Why are we doing this?

The Add people option is used to invite or add users who need to participate in the project.

Step 4: Enter the team member's email

1. In the Names or emails field, enter the email address of the team member.
2. More than one person can be added if required.

Why are we doing this?

The email address identifies the Jira user who needs access to the project.

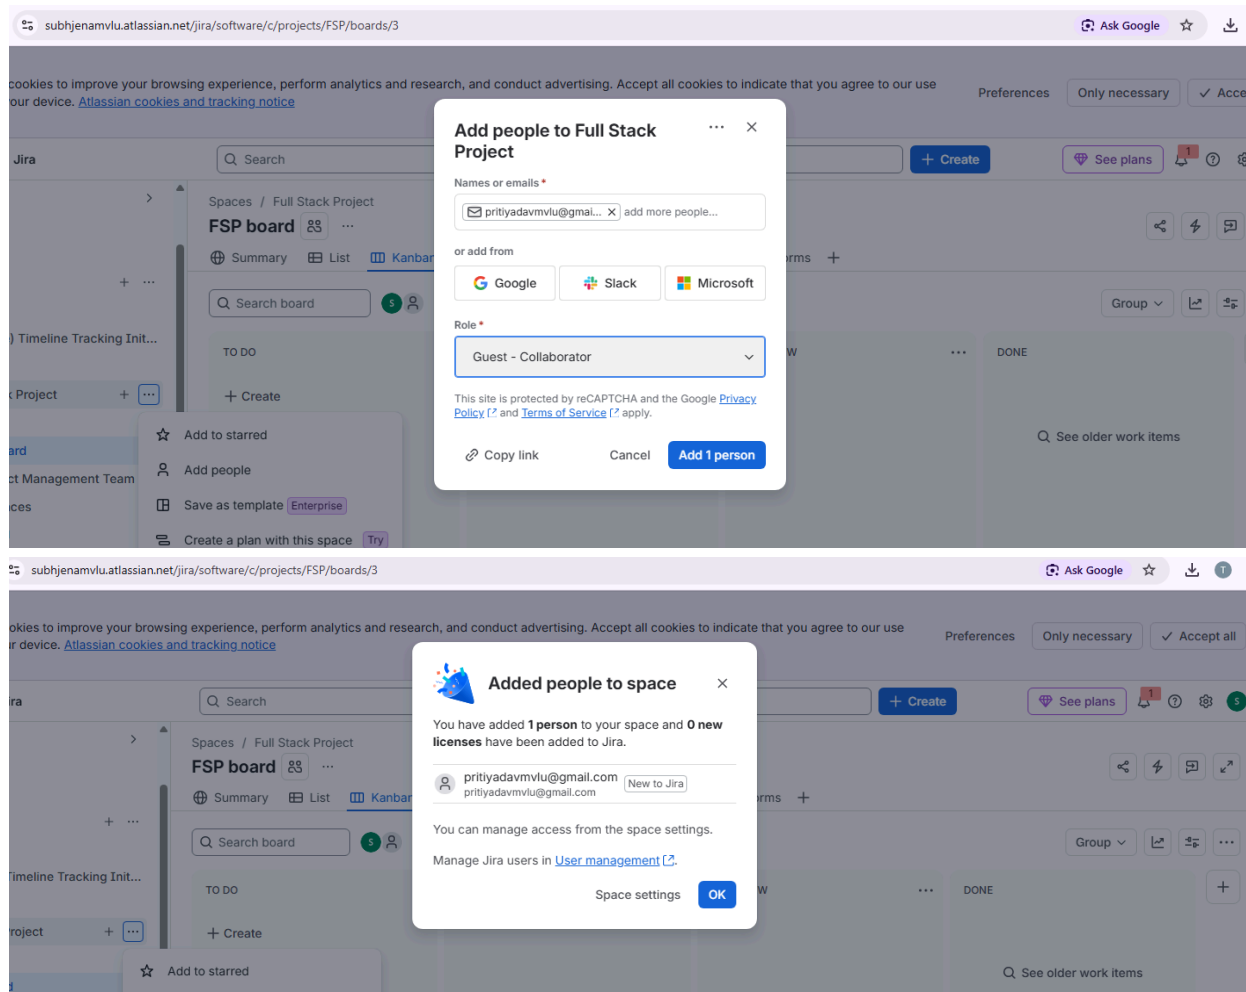

Step 5: Select the role

1. Go to the Role field.

2. Select the appropriate role for the team member.
3. The available options shown in the practical include:
 - o Administrator
 - o Guest – Collaborator

Why are we doing this?

A role determines what the team member is allowed to do or access within the project/space. Therefore, the role should be selected according to the person's responsibility.

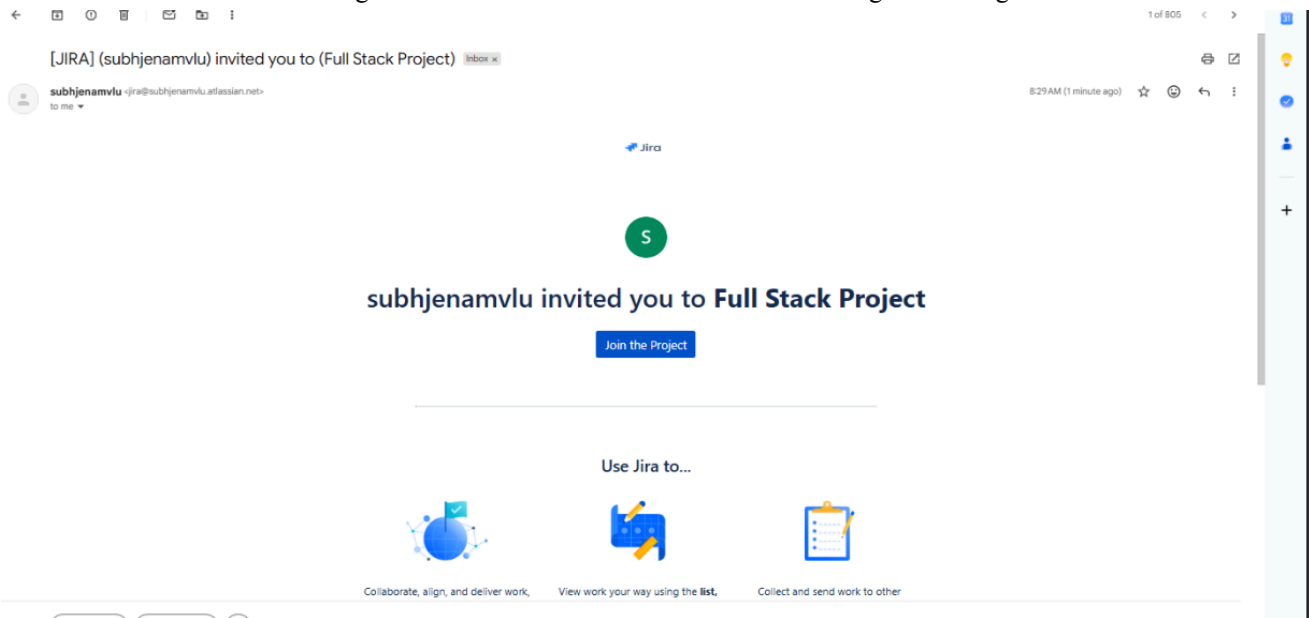

Step 6: Add the person

1. After entering the email address and selecting the role, click Add 1 person.
2. The selected person will be added to the project/space.

Why are we doing this?

This confirms the addition and gives the selected team member access according to the assigned role.

The team member was successfully added to the Full Stack Project with the required role.

Step 1: Open the project menu

- ## Why?

Step 2: Select Add people

- ## Why?

Step 3: Add a group of people

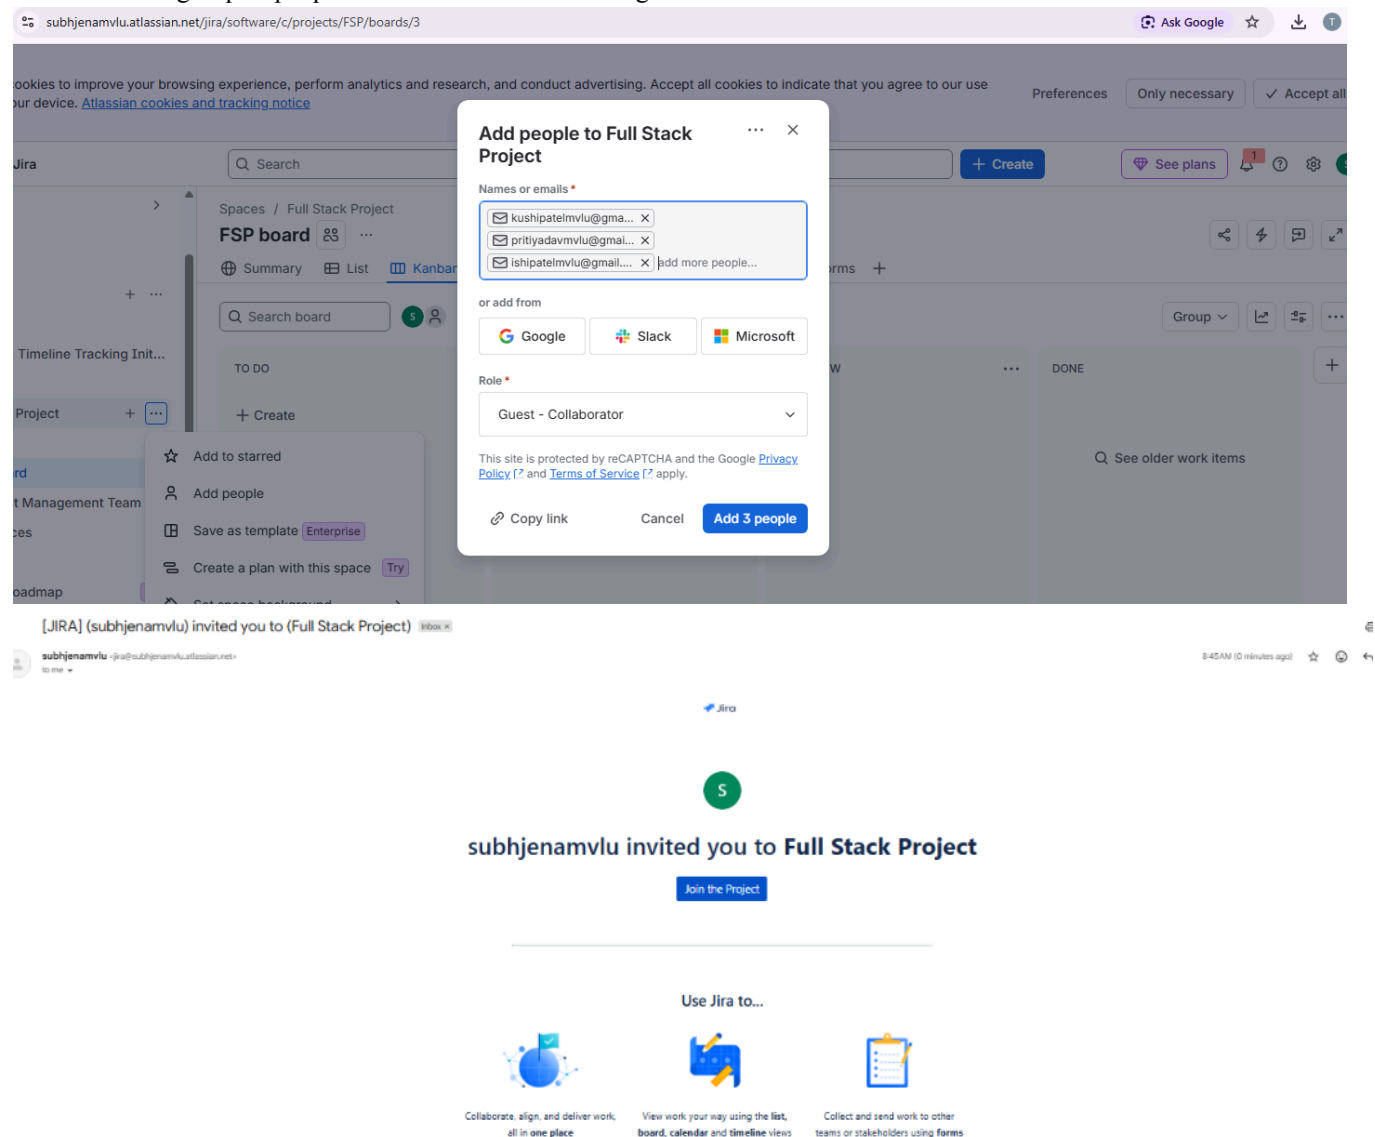

- ## Why?

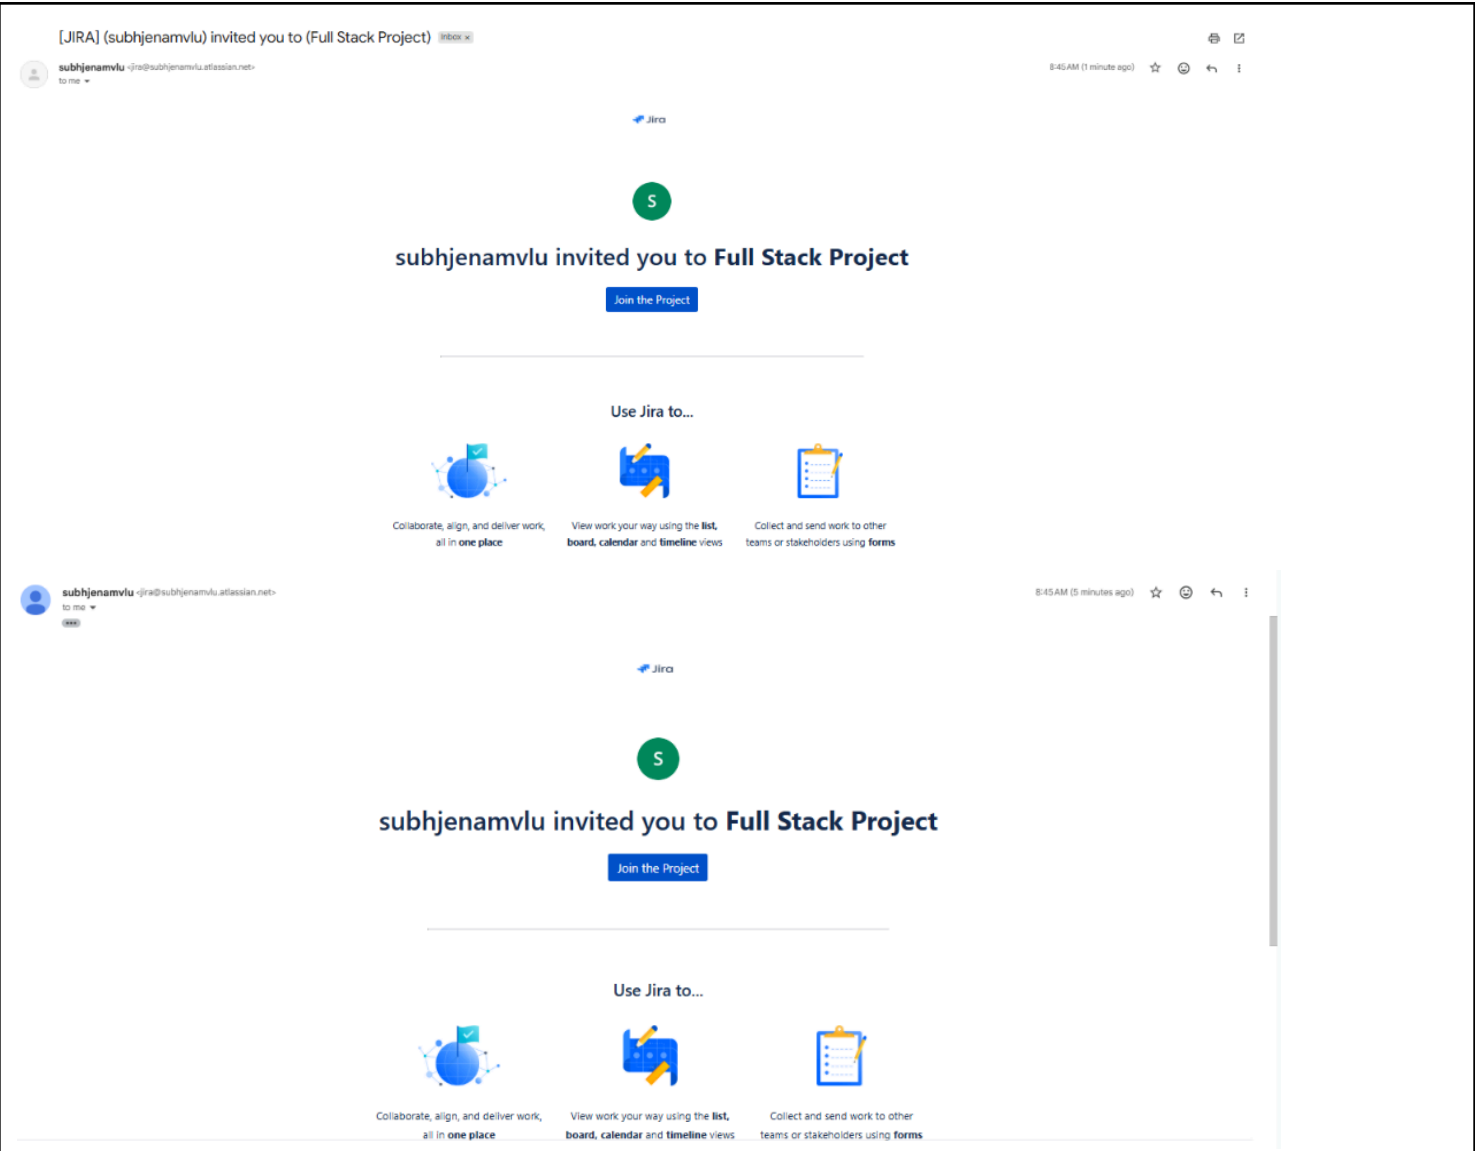

1. Select the required role for the group.
2. Choose the role according to their responsibilities.

Why?

1. Click the Add button.

2. The selected group of people will be added with the assigned role.

RESULT
The required group of people was successfully added to the Full Stack Project and assigned the appropriate role.
